AutoCAD and AutoCAD LT are cross-platform, cross-compatibility products that run on Windows, macOS, and Linux. AutoCAD is available for purchase on a perpetual license (\$1250 per year for users of Autodesk Subscription Services; \$750 for students, teachers, and other qualifying users) or a perpetual license with a training discount (\$1250 per year for users of Autodesk Subscription Services; \$750 for students, teachers, and other qualifying users). AutoCAD LT is available for purchase on a perpetual license for \$750. AutoCAD and AutoCAD LT are also available for purchase on a trial basis. Users can download a 30-day trial of AutoCAD or AutoCAD LT on each of the supported platforms. Each trial version of AutoCAD or AutoCAD LT is accompanied by an updated version of the software that runs until the end of the trial period. The trial version of AutoCAD is not available for purchase, while the trial version of AutoCAD LT can be purchased for \$750. AutoCAD LT is designed for use on an office workstation or computer system with a graphics card, processor, and hard drive to run AutoCAD LT. AutoCAD is available for purchase on a perpetual license or a perpetual license with a training discount (\$1250 per year for users of Autodesk Subscription Services; \$750 for students, teachers, and other qualifying users). AutoCAD LT is available for purchase on a perpetual license for \$750. AutoCAD and AutoCAD LT are completely integrated CAD programs that work together to meet the needs of the designer. The focus of AutoCAD is designing 2D and 3D drawings, 3D models, and components of mechanical assemblies. AutoCAD LT is available for purchase on a perpetual license (\$750) or as part of AutoCAD (\$1250), and is geared towards creating single- and multi-frame 2D drawings, 2D layouts, 2D sketches, and 2D BIM models, as well as 3D components and assemblies. AutoCAD LT is also designed for use on a desktop computer with a graphics card, processor, and hard drive to run AutoCAD LT. AutoCAD is priced based on the number of features available in the product and the complexity of the drawing. For example, basic AutoCAD users can create 2D drawings, models, and components of mechanical assemblies

SBS's news show "The Jongsuk Show" has been holding an election campaign rally in the university town of Sungkok since Aug. 8. During the event, a slogan with the words "We hate Muslims" was written on a poster by student activists. Then on Aug. 9, the screen of The Jongsuk Show was filled with images of Adolf Hitler, Mussolini, and Tojo. According to the show's host, The Jongsuk Show is using humor to make an anti-Muslim campaign statement in the current political climate. There are four episodes of The Jongsuk Show, and two of them are about Muslims. On Aug. 8, a Muslim male student gave a presentation and afterwards the host used racist slurs to call him "Muslim." On the next day, a female student joined a discussion on the news. The host used racist slurs to make fun of her. On Aug. 10, another female student was featured in a comedic segment about Muslim girls who are married off to men 20 years older than them. Lastly, in a last segment on Aug. 12, a female student guest gave her opinion on whether she believed Muslims were capable of hating other religions. SBS has been heavily criticized for these jokes. The manager of The Jongsuk Show admitted that some of the segments were really out of line and that

What's New in the AutoCAD?

New HVAC & Plumbing (HP) dimensions: HVAC and plumbing dimensions are now separated to facilitate drawings of HVAC or plumbing systems, for example, of buildings. You can edit HVAC or plumbing dimensions while you're editing either system. (video: 1:04 min.) New Dynamic Array: The Dynamic Array tool now has a dialog window that helps you make more sophisticated drawings. For example, select multiple blocks and you can change the amount of space between them. You can also snap to grid or to the Dynamic Array tool window. (video: 1:16 min.) New Transform tool: You can now change the direction of a block, such as a circle, and immediately see the result in the drawing. You can also rotate blocks and guides so that their angle is 90° (straight), 45° (45°), or 135° (90°). (video: 1:02 min.) New Graphic and Dynamic Array tools: You can edit shape settings directly in the Graphic or Dynamic Array tool. For example, you can edit the thickness of a circle or change the radius of a polyline. You can change these settings for new objects, such as a polyline or a circle. (video: 1:15 min.) New Visual Layers tool: You can now see Layers and Visual Layers visually in a drawing window. This is helpful if you are creating a drawing that may have many layers. (video: 1:03 min.) New Dimension tool: You can now create and modify the length, height, or width of a dimension. You can use the Format icon or the grip to move a dimension and edit its length, height, or width. You can use the Grip to edit the length, height, or width of a dimension or to quickly create a new dimension. (video: 1:26 min.) New 3D Extrude and 3D Stroke: You can easily make geometry into a 3D model and then extrude or stroke the geometry. A new 3D profile option lets you change the surface of the 3D geometry. (video: 1:04 min.) New Dimension styles: You can now use the Dimension Style dialog window to quickly set the style of multiple dimensions. (video: 1:05 min.)
