the front, and on the back where the battery housing is located. My first impression after unboxing the Q702 is that it is a nice looking unit. Styling is somewhat minimalist but very effective. The tablet part, once detached, has a nice weight, and no buttons or switches are located in awkward or intrusive positions.

Why Should I Get an SSD Upgrade? An SSD is a solid state drive – it's a storage device built with flash memory that can be used for

---

computers, desktops, laptops, tablets, mobile phones, iPods, and more. It's faster than traditional hard drives – and you'll see a big difference if you install an SSD upgrade in your computer. Think of the hard disk as a built-in file cabinet. It's great for storing your files and documents, but it's just as susceptible to damage as a traditional file cabinet. Like a typical hard disk, an SSD is designed to store and retrieve data, but it does so by using flash

---

memory, which is one of the fastest ways to store data. An SSD is completely different than a traditional hard drive and, once you install it, you'll see an immediate difference in how your computer boots, loads programs, and performs most other tasks. Some people mistakenly think that if you want to upgrade to an SSD, you'll need to spend a ton of money. But that's not the case. You can get a decent performance SSD for as little as \$100 to \$300.

---

It's a great investment, and your computer will be that much better. SSD Performance There are two key features that make a SSD different from a traditional hard drive. First, the flash memory is much more expensive

Download images from Tumblr blogs KEYMACRO is a small tool that helps you download images from Tumblr blogs. Gettumblr is a lightweight and

---

portable application that downloads images from Tumblr blogs, as the name implies. It can be effortlessly handled, regardless of the user's level of experience.

Since installation is not a prerequisite, you can just store Gettumblr on a USB flash drive or similar storage unit, and run it on any computer. Therefore, you can keep the tool in your pocket whenever you're on the move.

Alternatively, you can just drop Gettumblr on the hard drive and

---

run the executable file directly. What's more important is that the Windows Registry section does not receive new entries, and files are not left behind on the hard drive after program removal. The interface of the utility is based on a common window with a plain layout. The "what you see is what you get" concept clearly applies to the app, as there are no other options available, aside from the ones shown in the main frame. So, all you have to do is write the

---

name of the Tumblr blog in question and specify how many pages you want to download pictures from. Gettumblr displays the corresponding links in the main application window right away. The straightforward program requires a very low quantity of CPU and system memory, so it does not interfere with the runtime of other active processes. It has a good response time and gets links fast, without causing the operating system to

other than the one about impeaching Hillary Clinton. A bad idea that has a guaranteed negative outcome. 2. GOP Presidential Debaters All Say They'd Sign Executive Orders If They Take the White House Although a real option for some GOP candidates, executive orders are anathema to most Americans. In fact, most Americans have not been sufficiently brainwashed to fully realize this. 3. Trump Tries to Say National Motto is USA,

---

But It's "In God We Trust" A classic Trump moment. For some reason, Trump uses the motto "In God We Trust" as a means of saying we can't trust him to "give up that 1 percent." But it's not "1 percent." It's the 1 percent — the donor class — that he is seeking to give up on him. 4.
