Hot Virtual Keyboard Free Download [2022]

Hot Virtual Keyboard Free Download is an intuitive application that gives you access to a virtual keyboard on the screen, using the mouse or the touch screen. It comes in handy when your actual keyboard has problems, such as a stuck key or slow responsiveness, as well as in situations when you need to type in sensitive data and fear of keyloggers that might be monitoring your PC. A virtual keyboard that can be toggled active at any time. Aside from the standard keys, the keyboard also provides buttons for changing the input language, Cut, Copy, Paste and Undo functions, viewing and changing hotkeys, and accessing options. At initialization, the tool creates an icon in the system tray area, where you can show or hide the virtual keyboard, as well as access its wide range of options. The on-screen keyboard stays on top of other windows by default, and you can make it run at system startup automatically, set its priority high, as well as change the theme and drawing styles. Change the style of your keyboard and use gestures to control it. Other appearance customization options focus on the transparency level, background picture, font and characters font. Moreover, you can lock the aspect ratio and window size, set a delay for disappearing, configure typing aid settings (e.g. enable autoclick and key repeat), as well as use gestures. Additional features of Hot Virtual Keyboard let you enable word autocomplete mode, download dictionaries from an online database, lock the language bar, hide hints and Windows icons, enable sounds, add dependencies, and others. Settings can be restored to their factory values at any time. A good option if you are looking for an on-screen keyboard. Hot Virtual Keyboard runs on a low quantity of CPU and system memory, so it's not a burden to the computer's performance. It has a very good response time and works smoothly, without causing the OS to hang, crash or show error dialogs. Thanks to its intuitive and numerous options, both simple and advanced, Hot Virtual Keyboard should meet the requirements of all users. Hot Virtual Keyboard Screenshot: Hot Virtual Keyboard is an intuitive application that gives you access to a virtual keyboard on the screen, using the mouse or the touch screen.
