Mankind's first space program was known as 'Project Orion'. Orion's great value was to be humanity's first time machine. Napster was a program that allowed users to download songs illegally. It was shut down by the record label industry because of copyright violations and legal problems. The best way to

download music is still the same. Go to iTunes and buy it. The record labels have set things up so that you can only download illegally if you use Napster. Go to someplace that isn't even listed on Napster and download it. As soon as iTunes becomes a popular download site (it's the number 2 site right behind Limewire) Napster can be downloaded again. It's always good to be prepared!
